SUMMARY

Frontend-focused Full Stack Developer crafting high-performance, user-centric applications. Proficient in React, TypeScript, and Node.js to build scalable solutions from concept to deployment.

Skills: JavaScript, Python, SQL, React.js, Next.js, Node.js Express.js, Mongo DB, Supabase, Firebase

Tools: VScode, Github, Firebase, Vercel, Netlify, ChatGPT, Claude, G-suite, n8n, Notion, LLMs, Qualtrics, CloudResearch

PROJECTS

Money Flow - Modern Financial Tracker

- Architected full-stack financial tracker using Next.js, Supabase PostgreSQL to monitor expenses, income, and subscriptions with secure Google OAuth.
- Built interactive wallet based spending visualizations and dashboards using dynamic charts for clear financial insight.
- Developed modern UI with Shadcn UI for a polished, responsive user experience.

Arun Bullet Works - Workshop Management System

- Developed a comprehensive web application for "Arun Bullet Works," streamlining service booking and inventory tracking, which led to a 30% increase in online service inquiries within the first week of deployment.
- Boosted customer conversion by 20% within one week by engineering a high-utility service portal featuring automated booking workflows, integrated Google Maps API, Whatsapp API for navigation, and localized contact modules to streamline the user acquisition funnel.

Buzzed News Blog - News Aggregator Platform

- Developed a news blog web platform that aggregates news from various sources & trending articles in one place
- Built modern using React.js, Tailwind-CSS, React Router to achieve clear, concise UI that other news platform fail to provide, with constant updated feed & popular stories

EDUCATION

Bachelor of Engineering - Mechanical   2019-2023

Cumulative Grade Points (CGPA) - 7.83

Higher Secondary School   2018

Percentage - 63%

EXPERIENCE

Independent Contractor - Amazon Mechanical Turk (Remote)   2022 - 2024

- Specialized in high-volume, accurate data processing, categorization, and transcription tasks.
- Solved over 5000+ human intelligent tasks (HIT) in fields like data processing, research & analysis, content moderation.
- Maintained a exceptional feedback scores (98% accuracy) through rigorous attention to detail and adherence to protocol.
- **Skills Used** : Data Annotation, Quality Assurance, Transcription, Research.
